

PRESENTS

# BORDER BORONIA BACK FROM THE BRINK

FILM  
SCREENING

*Border Boronia: Back from the brink* highlights the conservation work being undertaken to save *Boronia repanda*, an endangered species found only on the Granite Belt.

**BORDER BORONIA FILM**  
2:00 PM

The movie will be followed by a short talk by Dr Don Sands on the *Heliozelid* spp. moths that *Boronia* spp rely on for pollination, and ultimately, survival.

**DON SANDS PRESENTATION**  
2:15 PM

Geraldine Hollingsworth from GBSANS will provide a presentation about how GBSANS and Ready to Adapt are supporting native species through their bushland linkages project.

**GBSANS PRESENTATION**  
3:15 PM

*Boronia repanda* (Granite rose) is one of the Granite Belt's threatened species facing extinction due to native vegetation clearing activities. Join us for the Consortium's movie presentation to increase awareness about this unique native plant.
